CTFW2915F SERIES
From 1.5µH to 33µH

CHARACTERISTICS

DESCRIPTION: SMD Shielded High Current Power Inductors

FEATURES:
- Magnetic shielded structure, excellent resistance to electromagnetic interference.
- Sturdy construction.
- Low magnetic loss, low ESR, small parasitic capacitance.
- Closed magnetic circuit, super low buzzing, high density mount.
- The temperature rise of current and rated current less influenced by the environment.

APPLICATIONS: Storage inductor for high efficiency DC/DC converters, Single and polyphase buck converters, Filter for audio applications, Optimized for high current boost applications, Industrial control PC’s, Servers, DC/DC converters, LED lighting, Communication equipment, Navigation, etc.

OPERATING TEMPERATURE: -55°C to +125°C (The part temperature (ambient + temp. rise) of the product should not exceed 125°C in bad working condition. Circuit design, component placement, PWB trace size and thickness, airflow and other cooling provisions all affect the part temperature. Part temperature should be verified in the final application.

INDUCTANCE TOLERANCE: ±20%

TESTING: Inductance at 100kHz, 0.1V

PACKAGING: Tray packaging

MARKING: Parts are marked with inductance code.

MISCELLANEOUS: RoHS Compliant.

ADDITIONAL INFORMATION: Additional electrical & physical information available upon request.

SAMPLES AVAILABLE. See website for ordering information.
