

Chip Inductors for Power Applications

Our 1212FPS, 1616FPS, 242408FPS and 242418FPS series of semi-shielded chip size power inductors are designed with a high flux density ferrite core, having a small footprint of either 3x3, 4x4 or 6x6 mm as well as a flat profile. The inductance range covers 0.47µH to 1000µH, rated current up to 6.5A. The FPS inductors are magnetically shielded by using a ferrite-epoxy resin.

With our new 242418FP wire-wound chip size power inductor series FASTRON offers an inductance range from 1.2µH up to 1000µH and a max 5A rated current. Both the inductor families (unshielded FP as well as semi-shielded FPS series) have lead free pre-tinned terminals and provide good solderability. Of course all of our FP and FPS chip size inductors are RoHS compliant.

Applications Major applications for our FP and FPS inductor series are power applications (e.g. AC/DC and DC/DC converters) of small size with cost efficiency as one of the critical factors. The parts are used in stationary - as well as in handheld systems and portable devices, e.g. for driving LED backlight for tablet displays.

 Technical Data
 L – Value (ra

 SRF (min)

L – Value (rated inductance)	Measured with E4980AL Precision LCR meter or equivalent at frequency fL, 25°C ambient
SRF (min)	Measured with E4991B Impedance Analyzer or equivalent at 25°C ambient
DCR (max)	Measured at 25°C ambient
Rated DC Current : Irms	Max permissible DC Current that causes a 40°C typ. component temperature rise from 25°C ambient.
Saturation Current : Isat	For FPS, max permissible DC bias at 25°C ambient that causes inductance drop 30% (typ.) relating to open circuit inductance. For FP, max permissible DC bias at 25°C ambient that causes inductance drop 10% (typ.) relating to open circuit inductance.
Operating Temperature	-40°C to +125°C (including component self-heating): FPS -40°C to +150°C (including component self-heating): FP
Moisture Sensitivity Levels (MSL)	MSL Level 1, indicating unlimited floor life at \leq 30°C / 85% relative humidity
Surface Finishing	Flat top for perfect pick and place assembly
Pad Metallization	Tin as top layer
Wire Termination	Spot welding covered with tin layer
Recommended Soldering Method	Reflow

FASTRON's Component Key Characteristics

Approved according to AEC-Q200

Approved according to AEC-Q200 with High Temperature

Suitable for High Temperature

Part is RoHS conform and Halogen free

Mechanical Shock and Vibration Proof

Designed for High Q-values

Exceptionally High Q-values

Optimized for High Currents

Optimized for High Voltages

Semi-shielded Engineer's Kit: EK-1212FPS-X
