

## **Toroid Line Chokes (TLC)**

FASTRON's Toroid Line Chokes offer a wide range of inductance values from 10µH to 1mH. Offering seven series, able to carry currents from 0.1A up to 10A. The core material is an iron-powder mixture optimized for high saturation currents. The copper wire current density is approximately 6.5A/mm2. FASTRON's TLCs are offered as vertical mounted versions for THT assembly only. Customized lead-forming is available upon request.

**Applications** 

Switched mode power supplies and control units, EMI/RFI- suppression and filtering, line-filters, and output-chokes.
